

Here are some of the dialogues and exchanges from the event "Rethinking Human Development for Today's World" held on World Science Day for Peace and Development for the International Science Council and the United Nations Development Programme.

We explore nine directions on rethinking human development and what human development means for the 21st century, thirty years after the first Human Development Report was first released. For more information on Rethinking Human Development and the nine directions, please visit www.council.science/human-development to download our new publication and hear from contributors from around the world.

During the webinar, which can be viewed here: <https://fb.watch/1GqIn49GBO/> we asked participants the following question:

1. What are your views on the nine key elements for rethinking human development in today's world?
2. Are there additional directions and ideas we need to think about?

We encourage you to read our publication and the webpage, to answer these two question here: <https://council.science/rethinking-human-development-survey/>

What follows are the pertinent messages and comments accompanying the webinar through the online dialogue from participants during the dialogue. The views expressed on this dialogue are n

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

15:11:03 From Vishweshwaraiah Prakash : Ans to Q 1: Equal opportunity to all on basis of gender, countries, income , needs of each economy, role of Scientists, role of Food Science and Technology and Nutrition, physical and mental health care security to all must be Our some of the immediate Goals with Networking with UNDP with many International Organisations which are adhering bodies of ISC with their pivotal role in this Multidisciplinary inclusive role for this agenda to be taken to the next Higher Orbit..Dr Vish Prakash, President of IUFoST.

15:11:57 From Anne Thieme (International Science Council) :

Browse the “Conversations on Rethinking Human Development” multi-media website:

<https://stories.council.science/stories-human-development/>

15:16:02 From Gaston Lavoie : De Gaston Lavoie. First and foremost, we need to make ourselves better. Next, we need to make sure all the children are raised with love and respect. This should be taught in every school without exception because too many do not know what Love and respect is.

15:16:16 From Altaf Qadeer : Some new possibilities for research and practice -Please click on: <http://Cognitivenet.wordpress.com>

15:18:10 From Gwen Ramokgopa to All panelists : Greetings , Dr Gwen Ramokgopa from South Africa. Social and shared values are indeed central to building a more human

15:18:16 From Asanga Ranasinghe : A trilateral partnership, where moderate consumption and behavior is promoted, needs to be promoted:

15:18:20 From Asanga Ranasinghe : <https://www.youtube.com/watch?v=Q4o4GdBLG8k>

15:18:55 From Asanga Ranasinghe : This is crucial for planetary boundaries to be preserved.

15:19:53 From Gwen Ramokgopa to All panelists : Greetings , Dr Gwen Ramokgopa from South Africa. Social and shared values are indeed central to building a more humane world with human capabilities to prosper themselves and society in a modernizing digitalizing world.

15:20:47 From Asanga Ranasinghe : Ethical tech that supports underserved communities is also of paramount importance

15:20:52 From Asanga Ranasinghe : <https://www.facebook.com/SDGsTechAccelerator>

15:21:14 From Asanga Ranasinghe : The real wealth of a nation are its people - Mahbub Ul-Haq.

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

15:21:45 From David Watt to All panelists : Direction 5 - UNESCO's GEM report 2020 states that debating inclusive education (SDG4) is similar to abolishing slavery or ending apartheid.

15:21:49 From David Watt to All panelists : <https://en.unesco.org/gem-report/>

15:22:23 From Srijit Mishra to All panelists : It might also help from a metrics point of view to look at how we measure HDI. For instance, the MANUSH Characterization, <https://www.tandfonline.com/doi/abs/10.1080/19452829.2017.1422703?journalCode=cjhd20>

15:22:47 From Anne Thieme (International Science Council) :

Browse the "Conversations on Rethinking Human Development" multi-media website:

<https://stories.council.science/stories-human-development/>

15:22:49 From Jens Ostergaard : @ Gaston: spot on; I think two things should be considered to realize the full potential of our kind:

(1) BILDUNG (inner personal development)

[https://clubofrome.org/wp-](https://clubofrome.org/wp-content/uploads/2020/06/Bildung__Keep_Growing__by_Lene_Rache_Andersen__Excerpt.pdf)

[content/uploads/2020/06/Bildung__Keep_Growing__by_Lene_Rache_Andersen__Excerpt.pdf](https://clubofrome.org/wp-content/uploads/2020/06/Bildung__Keep_Growing__by_Lene_Rache_Andersen__Excerpt.pdf)

Europeans join here:

<https://europeanbildung.net/>

(2) GOVERNANCE (Management)

Introduce state of the art system-cybernetic management training and thinking to all relevant social systems; management is the operating system of these and urgently need an update; e.g. like Volkswagen is doing right now in order to embrace complexity to master the future and release the full potential of its system. Even Dr. Georg Kell (former UNGC) is now helping VW get back on the track.

15:22:59 From Anne Thieme (International Science Council) :

Read about the set of nine interconnected directions that draw from the contributions received from the interviews and commentaries gathered through the ISC-UNDP project on rethinking human development: www.council.science/human-development

15:23:03 From Pravat Kumar Swain to All panelists : Thank you so much

15:23:23 From Anne Thieme (International Science Council) :

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

- 15:23:47 From Harsh Chaturvedi to All panelists : Greetings ! point #9 :
Identification validation and support in developing Traditional knowledge can bring much required integration of Science band society
Dr Harsg Chaturvedi, IIT Guwahati
- 15:24:09 From Mathieu Denis : Great presentation by Asun St-Clair, thanks!
- 15:24:10 From Juergen Nagler : Many thanks for excellent summary of the 9 key points.
Looking forward to reading the new publication.
- 15:24:57 From Barbara Hankins : book by Riane Eisler The Real Wealth of Nations challenges Adam Smiths system. Her new book is called Nurturing our Humanity
- 15:24:58 From Dr Sihem Benrahou Benallal to All panelists : good initiative!
- 15:27:10 From Philipp Stadler : Thanks a lot for this webinar, greetings from Austria!
- 15:27:53 From Hamid Mobasheri to All panelists : It seems the human development roots In the morality, culture, and responsible action of all nations away from political, economic, racial and religion intentions and doctoring to make the Earth live-worthy for all living organisms. The developed human is the one who enjoys living every seconds of his life in an bidirectional harmonic manner with other creatures.
- 15:27:57 From Srijit Mishra to All panelists : A nice perspective of bringing together nature and human and there should be synergy between the two
- 15:28:11 From naimatullah.zafary to All panelists : Great learning from this webinar, greetings from Afghanistan!
- 15:28:30 From Dr Sihem Benrahou Benallal : thanks Dr Altaf Qadeer
- 15:28:51 From Vishweshwaraiah Prakash : Congratulations Prof Ratanlal for an Excellent Presentation bringing in Nature centred Developments which can be Sustainable...
- 15:29:02 From Robert Loftur-Thun : Thank you for emphasizing the importance of nature in development and regenerating soil health..
- 15:30:01 From Samukelisiwe Coka to All panelists : Siwe Coka - South African Association Women Graduates welcomes the call for a paradigm shift to nature-centered approach
- 15:30:35 From Sandhya Iyer to All panelists : Prof. Ratan Lal, excellent sharp presentation in nature centred development
- 15:32:26 From Sandhya Iyer to All panelists : Last year we published a book on Human Development in an Unequal world revisiting development processes of 40 countries over span of 4 centuries to see how history on the one hand contemporary approaches of growth led approach has led to sustainability and inequities of capabilities and human freedom. It might be of help to see the

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

book: <https://www.india.oup.com/product/human-development-in-an-unequal-world-9780199490240>

15:32:49 From Srijit Mishra to All panelists : Conversations on Rethinking Human Development is important. Look forward to reading the same and including it in my teaching on human development and public policy. Thanks ISC for sharing this.

15:33:03 From Barbara Hankins : I totally agree with empowering and educating women as the top priority

15:33:53 From Pradip Dey : I am happy to bring to your kind attention that AICRP (STCR) has organizing a Virtual Conference on "Developing Human Resources for Recalibrating STCR" today (10 November 2020) - the World Science Day for Peace and Development.

15:34:20 From Tasneem Mirza to All panelists : Thank you Prof Ratanlal for a beautiful articulation of the importance of nature-based development that is essential for human development. Question: Much of the traditional economic-centered development has also been advanced by multilateral development banks - such as through loans for economic growth, transportation networks and energy extraction. How do you think the MDBs can nurture a nature-based growth?

15:34:23 From Abdoulaye Mar Dieye to All panelists : Dear all. Powerful discussion. An issue that we must address in "rethinking HD" is about the criticality of context. Context does indeed matter. As well as its corollary "the legacy of history". Classical development theories tend to miss that. Mar (UNDP).

15:34:38 From Abdoulaye Mar Dieye to All panelists : how do we address that.

15:34:53 From Samukelisiwe Coka to All panelists : I second the call to educate and empower women for gender equality and food security. Women in the rural areas needs tenure rights in order to produce food for all but the patriarchal nature of leadership is leaving the women behind.

15:35:13 From Asanga Ranasinghe : Absolutely Ascension, no doubt.

15:35:58 From Josephine Ngaira to All panelists : Thanks St Clair And Rattan for the great presentation.

15:36:29 From Steve Brant to All panelists : Good morning from New York City. I am a former civil engineer (UMass-Amherst) who has worked in sustainable development from a systems-based development perspective since 1991. Buckminster Fuller, W. Edwards Deming and Russell L. Ackoff's work underly my efforts to advance the vision of development that works for all (not just the wealthiest humans) today. Riane Eisler's work is important as well, because today she is championing a Caring Economy model in which all aspects of human and biological life on Earth matters. She is a wonderful resource (still alive, fortunately, while Fuller, Deming and Ackoff are not). Here is a link to me speaking at the UN last year. In 3 minutes I presented the "new conversation" we need to start about humanity's choices in the years ahead. My focus was how it's now possible to

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

solve all our problems without killing each other... making war itself obsolete.

<https://www.youtube.com/watch?v=JOuJyKQgoTk&t=15s>

15:37:21 From Terry Ince (she her) : Appreciate the emphasis on the importance of nature's alignment to development.

15:37:33 From Kasirye Henry to All panelists : I am Kasirye Henry M the innovator SAT (Save A Tree) App that aim at reducing Tariff of Electricity, stimulating Electricity use to lift the burden of cooking off the Trees/halting deforestation. mrodstudio1@gmail.com Kampala Uganda.

15:37:35 From Alison Meston : We here at the International Science Council are so appreciative of all of your comments and questions and the shared dialogue that is going on during this discussion. Thank you!

15:38:30 From Lukwikilu Credo Mangayi to All panelists : I appreciate the emphasis placed on ecology in development. For this to happen our philosophical approach to development must change. I think that the concept of oikos - (Greek for home) implies that the earth is the home or household for all beings (humans and non humans)- is of central importance in the understanding of the ecological dimension of development in relation to Sustainable Economic Development.

15:40:19 From Srijit Mishra to All panelists : Thank you for bringing in the multi dimensional and multi cultural perspective

15:40:32 From Dr Sihem Benrahou Benallal : human development needs a great improvement of education

15:41:30 From Steve Brant : This link will take you to Riane Eisler's work, where partnership thinking replaces domination thinking. This world view change is a result of her many decades of human social system redesign research (she is a social systems scientist and anthropologist)
<https://centerforpartnership.org/>

15:41:31 From Asanga Ranasinghe : Mobility and migration are important for human development and realise full individual potentials. However, current means of human movement leave a huge carbon foot print. COVID-19 has drastically restricted movement. How can we use this towards environmental-centred development?

15:42:02 From Mohammed Humran to All panelists : we know that disorder world and unstable affected on human development on many area around the world >so how could scientists solve this issue ?

15:43:12 From Aggeliki Pappa : Dr Silem Benrahou we presented a concrete New Paradigm in Education in the United Nations Geneva Peace week 2020 2 days ago, please conduct me at info@3dlexiacosmos.com for sharing this and explore more together

15:43:20 From Steve Brant : While Buckminster Fuller, W.Edwards Deming and Russell L. Ackoff are no longer with us, these links take you to organizations advancing their systems-based developmental work today.

15:43:25 From Anna Myunghee Kim to All panelists : humanity suffers not only in Africa or the regions conventionally put in the Global South. But many western societies Humanity crisis is now the important issue of human development in many developed and high HDI countries such as the US. Discussions and policy on human development need to look at problems like family separation of undocumented migrants and

15:43:40 From Srijit Mishra to All panelists : Two important questions of what we might be excluding. Thank you

15:43:57 From Steve Brant : <https://www.bfi.org/>

15:44:12 From Steve Brant : <https://deming.org/>

15:44:20 From Alison Meston to Juergen Nagler and all panelists : that was your question :)

15:44:44 From Steve Brant : <https://www.youtube.com/watch?v=OqEeIG8aPPk>

15:44:46 From Coco Gunn to All panelists : Thank you all of you for your inputs through comments. Thanks Anne Thieme.

15:44:48 From Juergen Nagler : Brilliant question on: how to shift the global mindset from GDP/materialism to GNH/wellbeing & SDGs?

15:45:20 From Juergen Nagler : My attempt to answer this question:
<https://council.science/human-development/latest-contributions/we-become-what-we-think-the-key-role-of-mindsets-in-human-development/>

15:46:02 From Anna Myunghee Kim to All panelists : and structural and institutional racism that are pervasive in many developed nations that are in the category of very high HDI nations

15:46:05 From Ahmed Hourani : Dear everyone, I'm really impressed.. anyone knows how to download the chat? (Yes! Here it is, from the ISC!)

15:46:18 From RANOJIT KUMAR DUTTA to All panelists : Thank you @Anne Thieme, sure, I enjoy the webinar about on Rethinking Human Development for today's world.

15:46:28 From Altaf Qadeer : "Meta Collective Intelligence" can be one way to work together.

15:47:56 From Dr Sihem Benrahou Benallal : good governance also need real democracy

15:48:10 From Dr Sihem Benrahou Benallal : and human security

15:49:40 From Dr Sihem Benrahou Benallal : please is there certificate of participation ?

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

- 15:50:15 From Asanga Ranasinghe : Human security is already included in Nussbaum's 10 central capabilities.
- 15:50:22 From Megha Sud to All panelists : Please see this essay from one of our contributors speaking of including human security as a key element in our discussion: <https://council.science/human-development/latest-contributions/des-gasper-has-four-suggestions-for-the-rearticulating-of-human-development>
- 15:50:24 From Sandhya Iyer to All panelists : Sudhir Anand and Amartya Sen had argued that income has an upward limit.
- 15:50:29 From Samukelisiwe Coka to All panelists : What do the panel think about the role of Grassroots women in being driver's of their own human development as we have lost 20 years of policy appropriate in South Africa driving women to structural poverty. Siwe Coka
- 15:50:41 From Megha Sud : Please see this essay from one of our contributors speaking of including human security as a key element in our discussion: <https://council.science/human-development/latest-contributions/des-gasper-has-four-suggestions-for-the-rearticulating-of-human-development/>
- 15:50:45 From Sandhya Iyer to All panelists : Can we start discounting income index such that when economic dimension is greater than non-economic dimensions, its rank will be reduced. Would be a better way to penalize excesses taking place due to growth rates
- 15:50:51 From Anna Myunghee Kim to All panelists : Thinking human development in the binary geopolitical framework- the Global South conveniently referring to Asia and Africa and the Global North referring to the West is now outdated. There are so many setbacks in regard to humanity in western developed countries that have been simply overlooked
- 15:51:07 From Sandhya Iyer to All panelists : and Reduce GDP driven approach to development
- 15:52:50 From Dr Sihem Benrahou Benallal : collaboration between communities can improve both human development and sustainable development
- 15:53:32 From Dr Sihem Benrahou Benallal : yes I agree hunger is more crucial than covid19
- 15:53:42 From Barbara Hankins : Collaboration per se can improve everything..
- 15:53:54 From Dr Sihem Benrahou Benallal : yes
- 15:54:14 From Meshack Kiplagat to All panelists : For the next 17 days Community Outreach for Action and Development will be running a educative piece on SDGs and its relation to climate change. Twitter:@COADKENYA, Instagram:Coad_Kenya and Facebook: Community Outreach for Action & Development

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

- 15:55:08 From Vishweshwaraiah Prakash : Thanks Anne Theime . Subject is wonderful for Capacity Building especially Hunger and Starvation which is manmade. Food Science and adaptable Technologies intervention must be utilized from Farm to the Mouth in the travel of Food.
- 15:55:11 From Sandhya Iyer to All panelists : Low HDI countries have different trade off and challenges to sustainability as compared to middle and high HDI countries. Hence we need to theorise human development approach
- 15:55:13 From Barbara Hankins : I love 'mingle' them
- 15:55:16 From Mohammed Humran to All panelists : I think that UN and International research center should help community to achieve and invest projects not to send packages of food for poor people to help
- 15:55:30 From Anna Myunghee Kim to All panelists : Suffering by overt racism and stigmatisation and disproportionate drop-out rate among children of colour in educational institutions, say, public schools in many western immigrant receiving countries is a real threat to humanity and practical backlash of human development. But it has never been discussed in the context of human development and democracy
- 15:55:53 From Sandhya Iyer to All panelists : Amazing discussion.. this global dialogue needs to continue
- 15:56:00 From Julio Lumbreras to All panelists : I also love "mingle" them!
- 15:56:04 From Sandhya Iyer to All panelists : thanks for this great platform
- 15:56:16 From Marta Pedrajas to All panelists : Thank you for this debate!
- 15:56:32 From Terry Ince (she her) : Excellent contributions by all
- 15:56:39 From Josephine Ngaira to All panelists : How can human development be achieved when there is a lot of injustice and discrimination on gender, colour
- 15:56:41 From Megha Sud : Thank you all for the great questions. We won't have time to answer them all but will consider them as input to the ongoing conversation on rethinking human development.
- 15:56:46 From Mohammed Humran to All panelists : thank you so much
- 15:56:47 From Terry Ince (she her) : Brilliant moderation as well
- 15:57:05 From Anne Thieme (International Science Council) : Thank you so much for your questions. We won't have time to answer them all but will consider them as input to the ongoing conversation on rethinking human development.
- 15:57:05 From Coco Gunn to All panelists : indeed, very interesting !

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

15:57:26 From Jesus Pizarro to All panelists : please shared the recording later. It is a great conversation. thanks

15:57:36 From Meshack Kiplagat to All panelists : Very informative conservation.

15:57:41 From Kai-Hsin Hung to All panelists : .

15:57:42 From Robert Loftur-Thun : SDG 13: Climate Action, SDG 14 Life Below Water, SDG 15 Life Above Land.. It is very encouraging to hear how nature based values can be integrated into the other 14 SDG's

15:57:48 From Thamsanqa Robert Ncube to All panelists : Comments: Our collective commitment to the 17 Global Goals is our most important defense in ensuring that benefits of our modernizing world are shared among all nations and people and not just by privileged few etc.

15:58:07 From Srijit Mishra to All panelists : Some of you may like to have a look at the work Odisha Millets Mission where Government and civil society and academic came together for a pro people initiative <http://www.milletsodisha.com/>

15:58:14 From Eliane Ubalijoro to All panelists : Thank you for an excellent inspiring event

15:58:56 From Anne Thieme (International Science Council) to Sara Varughese and all panelists : Hello Sara, you have your hand raised, would you like to pose a question in the Q&A section?

15:59:10 From Kasirye Henry to All panelists : My efforts are centered on SDG7 and SDG13 mrodstudio1@gmail.com

15:59:41 From Pradip Dey : The last but not least SDG (#17) of partnership assumes greater significance in view of current pandemics.

15:59:59 From Anne Thieme (International Science Council) :

Access our publication "Conversations on Rethinking Human Development" here:

<https://council.science/wp-content/uploads/2020/06/Conversations-on-Rethinking-Human-Development.pdf>

16:00:28 From Augusta Maria Paci to All panelists : Very interesting discussion for accelerating the greening of our societies, my thanks Augusta Maria Paci

16:00:36 From Sandhya Iyer to All panelists : thanks Anne

16:00:39 From Mohamed Essaaidi : Thanks !

16:00:41 From Megha Sud to Sandhya Iyer and all panelists : You can also explore the contributions here: <https://stories.council.science/stories-human-development/>

16:00:58 From Bertha Cecilia Garcia Cienfuegos : SDG 6, SDG 11, SDG 13

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

- 16:01:30 From Pravat Kumar Swain : Thank you so much
- 16:02:05 From Hamid Mobasheri to All panelists : Thank you all, Science is the power, educating the undeveloped nations and people is a must to make them stand up and solve all their problems. Nowadays, it is not a big deal to make it happen through Internet.
- 16:02:05 From Mahouton Norbert Hounkonnou : Thanks for this wonderful webinar.
- 16:02:31 From Manzoor Soomro to All panelists : Colleagues, cross cutting is the Science Education using Inquiry Based Learning as driver of human development
- 16:02:59 From Pradip Dey : Thank you ISC for organising such a thought provoking session.....Thank you all.....👏👏👏👏👏 Stay safe, healthy and blessed
- 16:03:26 From Pravat Kumar Swain : Thank you ISC
- 16:03:43 From Marisol Nieto to All panelists : Great webinar, ISC and UNDP, Thanks!
- 16:04:16 From Barbara Hankins : thank you for an informative and encouraging webinar
- 16:04:21 From Josephine Ngaira to All panelists : Thanks very much for the great talk ISC
- 16:04:22 From Altaf Qadeer : Protecting our cognitive environment along with our physical environment. The dream of a teacher is to fulfil the dream of others. Thanks to all for great ideas and collective potential.
- 16:04:22 From CIGB : Great webinar, thanks so much for this opportunity. Collaboration between communities is essential for the development of science and humanity. Regards from Cuba.
- 16:04:23 From Anna Myunghee Kim to All panelists : Upcoming Human Development reports should reflect humanity crisis in relation to international migration (increase of asylum-seeking population) and failing of the public education system in terms of promoting diversity and racial equity
- 16:04:40 From Samukelisiwe Coka to All panelists : Thank you for an imperative conversation
- 16:04:46 From Asanga Ranasinghe : Thank you Anne, ISC team and everyone who shared their knowledge towards making the world a better place!
- 16:04:51 From Vishweshwaraiah Prakash : It is important to Link Science to Traditional Wisdom and Practices especially on Evidence Based Science and epidemiology and Social Science which is the Focus of ISC. IUFoST and IUNS is Focussing on this very Important area ...Dr Vish Prakash, President of IUFoST.
- 16:05:28 From Abdoulaye Mar Dieye to All panelists : Recommendations: Can this conversation continue

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

- 16:05:44 From Abdoulaye Mar Dieye to All panelists : I see Pedro answered YES.
- 16:05:49 From Manzoor Soomro to All panelists : Thanks a lot ISC for a wonderful event.
- 16:05:50 From Sandhya Iyer to All panelists : thank you UNDP and ISC a great discussion
- 16:06:14 From Waseem Ahmed : Thank you very much organisers, It was worth joining event.
- 16:06:17 From Ouafa Boualame : Very enriching webinar. Thanks to all
- 16:06:18 From Megha Sud : Please follow this ongoing conversation here:
<https://stories.council.science/stories-human-development/>
- 16:06:21 From Rayan Khan to All panelists : thank you so much
- 16:06:23 From Winston Mellowes to All panelists : Thank you for this excellent seminar
- 16:06:25 From Vishweshwaraiah Prakash : Bye to all..Thank you...Dr Vish Prakash
- 16:06:26 From Kitso Fredrique Marape to All panelists : Where can I access this event discussion
- 16:06:33 From Larissa Batrancea : Thank you for all the presentations and information shared during this webinar! I appreciate this opportunity and I am looking forward to taking part in similar events!
- 16:06:33 From Anne Thieme (International Science Council) :
- Please share with us any aspects that you think we have missed in the discussion on Rethinking Human Development for today's world:
<https://council.science/rethinking-human-development-survey/>
- 16:06:34 From Manzoor Soomro to All panelists : This is Manzoor Soomro, President of ECO Science Foundation (ECOSF.ORG)
- 16:06:34 From Julia Melnichouk to All panelists : thank you very much for the webinar, really inspiring!
- 16:06:40 From Vena Pearl Bongolan to All panelists : Thank you ladies and gentlemen of the panel.
- 16:06:40 From Nilushi Kumarasinghe : thank you!
- 16:06:41 From Angel Bravo : Thanks for the event, greetings from Chile and Mexico Adolfo Ibáñez University / Tecnológico de Monterrey
- 16:06:44 From David Watt to All panelists : thank you all and Tolu's guidance

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

- 16:06:44 From Bertha Cecilia Garcia Cienfuegos : Its very important promote sciences and technology , work in STEAM. and socialisation of science
- 16:06:48 From Pravat Kumar Swain : Thank you very much
- 16:06:52 From Pravat Kumar Swain : Thank you everyone
- 16:06:55 From Azizuddin Khan : Thanks for wonderful webinar
- 16:07:02 From Pravat Kumar Swain : Excellent webinar
- 16:07:02 From Marta Pedrajas to All panelists : Thank you so m much!!
- 16:07:03 From Wole Oladapo to All panelists : thank you!
- 16:07:03 From Dontha Murali to All panelists : Thank You all
- 16:07:03 From Bertha Cecilia Garcia Cienfuegos : Thank so much ISC
- 16:07:08 From Paul Pynn to All panelists : Thanks all
- 16:07:10 From Awaluddin Tjalla to All panelists : Thank you very much. Awaluddin, Jakarta
- 16:07:17 From Gabriella Verbovszky to All panelists : Thank you, it was truly wonderful !
- 16:07:18 From carmen rial to All panelists : Thanks, rom Brazil
- 16:07:23 From carmen rial to All panelists : from
- 16:07:30 From Lukwikilu Credo Mangayi to All panelists : Thank you everyone from Credo Mangayi (South Africa)
- 16:07:31 From Millie Kealy-Jensen to All panelists : thank you
- 16:07:35 From Steve Brant : Thank you! Last resource (bringing back Buckminster Fuller's World Game social science laboratory for developing win-win solutions for the world:
<https://worldgameworkshop.org/>
- 16:07:38 From Anne Thieme (International Science Council) :

Please share with us any aspects that you think we have missed in the discussion on Rethinking Human Development for today's world:
<https://council.science/rethinking-human-development-survey/>

- 16:07:45 From Tatiana Vlasova : Very productive discussion to be continued
- 16:07:50 From Hamid Mobasheri to All panelists : Thank you all and take care
- 16:07:50 From Anne Thieme (International Science Council) :

The International Science Council (ISC) is a non-governmental organization with a unique global membership that brings together 40 international scientific Unions and Associations and over 140 national and regional scientific organizations including Academies and Research Councils

Browse the “Conversations on Rethinking Human Development” multi-media website:

<https://stories.council.science/stories-human-development/>

- 16:07:56 From Anne Thieme (International Science Council) : Happy World Science Day!
- 16:08:42 From Josephine Ngaira : Great ISC organizers
- 16:08:49 From Yreno Juan Polo Huacacolqui to All panelists : Excellent webinar. Trujillo. Perú.
- 16:08:52 From Jennet Razo : Huge thanks from the Philippines! A strong advocate of #PlanetaryHealth here.
- 16:08:55 From Pravat Kumar Swain : Thank you ISC
- 16:09:11 From Gwen Ramokgopa to All panelists : thank you for the webinar and really looking at being responsive to evidence and knowledge , including indigenous knowledge systems.
- 16:09:16 From Mohammed Humran to All panelists : When we talk about human security and development around the world, when we see a map of the world, we find that 40% of the population consumes more than 60% of the resources, while 60% of the population consumes only less than 40% of the products in the world, meaning that the development of science and Technology without really wanting it in achieving prosperity for poor societies will only succeed if it finds credibility in dealing with poor communities and encouraging them in developing resources.
- 16:09:17 From Steve Brant : Happy World Science Day! Here’s Buckminster Fuller talking about how Spaceship Earth can be made to work for all through science and innovation
<https://www.youtube.com/watch?v=LQ3DXDONKmQ>
- 16:10:02 From Meshack Kiplagat to All panelists : Great thanks for a very informative conversation. looking forward for such great conversation. Communityoutreachorg@gmail.com
- 16:10:09 From Mohammed Humran to All panelists : Happy world Science Day
- 16:11:18 From Meshack Kiplagat : Great thanks for a very informative conversation. looking forward for such great conversation. Communityoutreachorg@gmail.com
- 16:13:08 From Leonid Tyschnyy to All panelists : Thanks to organizers, panelists and other participants.
