

Proposed resolution at the ISC General Assembly, 29-30 January 2025

The 3rd General Assembly of the ISC commends the International Science Council (ISC) for promoting the participation of Early & Mid-Career Researchers (EMCRs) and for recognizing their contributions!

To leverage their fresh perspectives and innovative ideas, the assembly suggests including more EMCRs in ISC main panels as speakers and also inviting them for roles in internal bodies.

These initiatives can help navigate the complexities of the scientific landscape and entrust EMCRs to contribute more meaningfully to the global science.
