# Our mission: a healthy planet

UNEP's Emissions Gap report highlights the urgent need for ambitious and scalable actions to meet the 1.5°C target by 2030.

ACHIEVING THIS GOAL REQUIRES

A unified global effort

Ambitious actionable solutions

Harnessing breakthrough research in planetary boundary science

## The Frontiers Planet Prize identifies

National Champions from  
each participating country

International Champions  
awarded \$1 million USD  
to fund their solutions

A unique mechanism  
Highlighting the best  
mission-driven science  
nominated by world-  
leading institutions

# The Frontiers Planet Prize **in numbers**

To ignite an Olympic spirit amongst institutions and countries to bring forward their best researchers and scientific solutions for planetary health.

**4000+** participating scientists

**610** universities

**43** National Champions

**7** International Champions

**\$6.6Mln** to support their research

## Mobilizing Science for a Global Green Renaissance Progress Report 1st edition

In this report, we share highlights from the first edition of the Frontiers Planet Prize and the accompanying progress it has made since its launch, on Earth Day, April 22nd, 2022.

We present an overview of all the institutions that have participated in the prize, the national academies that advocate the research excellence of their country, our esteemed partners and board members that empower the research community at large, and of course, the scientists that were nominated for their groundbreaking work on the planetary boundaries.

Download the reports

## Mobilizing Science for a Global Green Renaissance Progress Report 2nd edition

Earth Day 2023 – Earth Day 2024

The Frontiers Research Foundation launched its second edition of the Frontiers Planet Prize on Earth Day, April 22nd, 2023. In this report, we highlight key initiatives from the Prize's second year, including an overview of the participating institutions, newly onboarded partners, and academies that recognized the National Champions.

We also provide a summary of the outcomes from the second edition, showcasing the National and International Champions honored for their groundbreaking work on planetary boundaries. Additionally, we report on how the champions from the first edition have delivered impact with their work and are driving transformative change through their thought leadership in global initiatives and roundtables on planetary health.

The foundation  
facilitates the prize,  
the world of science  
owns it
