### Asia Science Mission for Sustainability

Anik Bhaduri, Kazuo Nadaoka and Ria Lambino

International Science Council

### Asia Science Mission

#### Mission

Promote transdisciplinary and evidence-based science to deliver actionable, context specific science informing regional policy and practice

### Meta Network

- Innovative integration mechanism.
- Connects fragmented data and knowledge.
- Links institutions, groups, and biodiversity.
- Produces comprehensive insights.
- Enables sustainable solutions.

## Different way of doing research

- SDGs Demand Integration:
- Include culturally Relevant Insights
- Fill in Data Gaps
- Coordinated Regional Strategy for Impact

### What Will the Asia Science Mission Deliver?

Establish a co-designed and well-functioning Meta-Network to deliver actionable, context-specific science that informs regional policy and practice

Implement demonstration projects to address ecological, human health, social equity, and economic resilience

Facilitate bi-directional science-policy dialogues to reframe sustainability indicators for Asian relevance

Build capacity for policymakers, youth, and scientists to foster transdisciplinary research and effective stakeholder engagement.

# Demonstration Sites Selection Criteria

☐ Focus on Climate Change at the nexus of sectors and SDGs at local and regional levels Systems focused ☐ Transdisciplinary research □ Partnership with diverse stakeholders Locally focused Led from the affected region Potential for disruptive thinking ■ Focusing efforts to complement and integrate rather than compete with existing efforts to promote sustainability Accessibility to other funding ■ Low or Middle-Income countries have priority

Demonstratio n Site Selection

Call for Proposals announced	15 March 2025
Pre-proposals submission deadline	31 March 2025
Invitation for full proposals sent to selected pre-proposals	4 April 2025
Online proposal orientation workshop	7 April 2025
Proposals submission deadline	7 May 2025
Potential project site visits	May 2025
Announcement of demonstration projects selected on the Future Earth Asia website	6 June 2025
Start of the projects (tentative)	July 2025

## Asia Science Mission at the Asia Pacific Forum Sustainable Development, Bangkok

- ISC –RFP and Future Earth-Asia team participated in APFSD 2025, engaging key stakeholders through sessions, a plenary statement, and side meetings.
- Focus on integrating fragmented sustainability knowledge, addressing key challenges, and leveraging partner capabilities.
- Strengthened collaborations with UN agencies (FAO, UNEP, UNESCAP, ADB) for demonstration sites and science-policy engagement.
- Engagement with research institutions (AIT, NIDA, SEI-Asia, IGES) to enhance research and policy integration.

### Outcomes

UNESCAP is interested in working with ASM to develop science-based approaches for SDG progress monitoring in Asia.

UNEP expressed enthusiasm for partnering with ASM in science-policy engagement, climate change, ecosystem management, and environmental governance

FAO is eager to collaborate with ASM and may provide existing demonstration sites to integrate ASM's co-design approach into real-world applications.

AIT (Asian Institute of Technology) – Discussed opportunities to bridge research and real-world sustainability applications in climate resilience, urban sustainability, and food security.

NIDA (National Institute of Development Administration) – Explored how ASM can support evidence-based policymaking through scientific assessments and data-driven insights in demonstration projects.

SEI-Asia (Stockholm Environment Institute – Asia Centre) – Expressed interest in co-developing sustainability assessment methodologies and contributing to resilience planning.

Next Steps: Follow-up meetings with UN agencies and advancing research partnerships.
